

# Our range of products :

- Vacuum tankers
- Vacuum tankers for hazardous wastes (ADR – ATEX)
- Dry waste suction units
- High pressure jetting units
- Combined sludge suction and jetting units
- Combined sludge suction and jetting units with water recycling system
- Combined sludge suction and jetting units with dewatering system (for septic tanks or grease traps)
- Mini suction and jetting machines mounted onto small trucks (< 6,5 tons)
- Refuse containers cleaning machines
- Cameras for the video inspection of canalizations
- System for pipe rehabilitation
- Vacuum pumps, high pressure pumps, transfer cases make Sacavi (Sale of components and spares to foreign constructors...)

## Spare parts :

Most of the parts and components building our equipment come from our own manufacturing (hose reels, hose booms, moving partitions, drive lines with air clutches, valves, filters, vacuum pumps, high pressure pumps, etc...)

Spares are always available and ready-to-dispatch in our stores  
The spares availability is granted for more than 10 years for each equipment.
